

Secure Knowledge Sharing with the Right People at the Right Time....

# Next Generation Knowledge Management

## Accreditations/Certifications

### ● Governance/Compliance

Demonstrates compliance with federal, state and local regulations, mandates and standards and provides secure and on demand documentation for ongoing audits, examinations and accreditations.

### ● Oversight

Empowers management to oversee situational and customized knowledge and more effectively engage employees, partners, vendors, contractors and other third-parties at the individual-level to protect your organization's reputation and trust and ensure better decisions and better results.

### ● Insurance/Risk

Demonstrates comprehensive risk management efforts across entire organization to reduce liabilities and threats and proactively target escalating insurance related costs and requirements.

### ● Legal Due Diligence/Duty of Care

Delivers automated CYA solutions for tracking and documenting individual-level acknowledgements of regulations, roles, procedures and organizational policies to replace expensive, manually intensive, status quo and less effective methodologies.

### ● Preparedness/Prevention/Response/Recovery

Eliminates awareness gaps and weaknesses to ensure all appropriate individuals understand their customized roles and responsibilities related to your organization's overall preparedness, prevention, response and recovery obligations.

### ● Security/Privacy

Implementation and management of customized procedures and acceptable usage policies and ensuring individuals understand updated knowledge and best practices to protect sensitive information from escalating and more sophisticated attacks that are targeting people's lack of awareness.

### ● Accountability/Transparency

Demonstrates full, accurate and timely disclosure of an organization's customized knowledge including secure knowledge sharing, accountability and auditability at the individual-level to ensure better decisions, proactive advantages and better bottom line results.
