

# Indicators Prove Prevention

Post-event reports reveal “pre-incident indicators” are always observed prior to the act of violence (see proof and timelines below) and conventional incident reporting, case management systems, employee/student record systems and annual training are siloed efforts and not preventing preventable incidents and tragedies. Awareness’s Community-wide Prevention Platform is proven and equipping individuals, organizations and communities to achieve all 6 essential steps to Prevention – awareness, collecting the dots, assessing the dots, connecting the dots, intervention and prevention – ultimately saving lives, reputations and bottom lines.

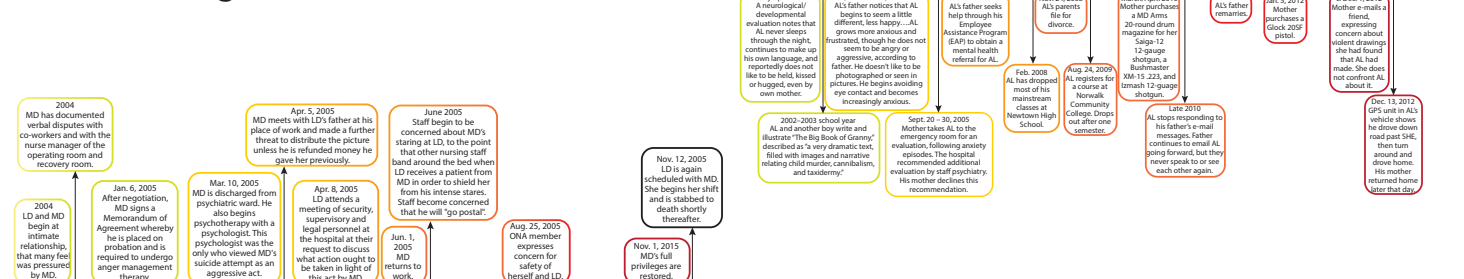

## Indicators leading up to Tucson, Arizona Shooting on January 8, 2011.

## Indicators leading up to WDBJ On-Air Shooting on August 26, 2015.

## Indicators leading up to Sandy Hook Elementary Shooting on December 14, 2012.

## Indicators leading up to Murder-Suicide at H<sup>á</sup>tel-Dieu Grace Hospital on November 12, 2005.
